PROJECTS

PulseBI – Business Intelligence Dashboard | bi-fast.vercel.app/

- Architected and deployed an AI-powered BI tool enabling instant data insights from raw datasets, reducing analysis time significantly.
- Built a React frontend with Chart.js (react-chartjs-2) and WebSocket integration for real-time, interactive dashboards and live data updates.
- Integrated Google Gemini AI + FastAPI + Pandas backend pipeline for automated data analysis and natural language querying.

FactlyAI – AI-Based Fact Checking Tool | factlyai.vercel.app/

- Developed a full stack application for automated claim verification and AI-generated content detection using third-party NLP APIs.
- Designed a clean, intuitive UI with real-time structured result delivery, improving user experience for fact-checking workflows.
- Integrated multiple REST APIs for multi-source claim analysis with structured JSON response parsing.

Library Management System | github.com/Mudit-tyagi-dev

- Built a full stack library system for managing books, users, and borrowing workflows with role-based access control.
- Developed RESTful APIs and implemented complete CRUD operations with PostgreSQL backend.
